Nice to meet you!

Hi there! Let's introduce ourselves. We, Monta, focus on the logistics of webshops. At the moment, we do this for more than 1.500 webshops via 15 different warehouses across the Netherlands and Germany. We take care of the processing and shipping of millions of online orders. Worldwide.

It all started in 1999: founder and CEO Edwin van der Ham started a packing company. At that time we were helping a large company by packing a huge amount of CD-ROMs. With those CD-ROMs people were able to go on the internet. Can you imagine?! That was a long time ago...

The packing company from then has grown into a company where we focus entirely on the logistics of webshops. We're sure you understand that we're happy we started "spreading the internet",

because now the number of webshops is insane!

If you want to know more about our history, services, possibilities, and/or values, please read on!

The Monta journey.

- 1999** **The beginning of Monta**
Actually we were called Montapacking, since that was our core business: packing. But not anymore...
- 2000** **Packing, packing, packing**
More and more businesses asked if we could help them with packing their goods. Some pretty big companies asked us to help them out. Our client base grew.
- 2006** **B2B logistics**
Many of our clients also needed help with their B2B logistics. So: we added a service!
- 2012** **Fulfilment**
The number of clients that were looking for a fulfilment partner became bigger and bigger. This enabled us to bundle the requests and thus decrease costs, which again attracted new clients. The number of warehouses grew rapidly. Woohoo!
- 2021** **Cloud-based software**
Since 2021 Monta's unique software (the software we use in our own warehouses) is also available for webshops with own warehouses.
